INTRODUCTION

"The Motivation is not only to add value to the Zilliqa ecosystem by pulling in liquidity from other blockchains, but also to create the value from within the Zilliqa ecosystem itself"

Lucky Clover (CLOVER) and LuckyC (LUCKY) are experimental tokenomic projects under the Zilliqa Blockchain. CLOVER and LUCKY are the ZRC2 cryptocurrencies for the projects respectively and each have their own proposed uses but are intrinsically linked. CLOVER is the token which allows the developers to bootstrap the projects, to allow HODLers to receive LUCKY from airdrops and distributions, and as a high value medium of exchange. LUCKY is the utility token that we envision our projects to be able to utilise in order to exchange for tangible benefits such as advertising or merchandise (virtual or real world).

CLOVER proposed use cases

- 1) Early adopters of CLOVER help to bootstrap the projects below. In order to reward those who have done so, we have plans to generate a special Founder NFT for those who hold at least 10 CLOVER by 10th Apr 2021. We may decide to reward bigger HODLers with an extra special NFT. Details to be given at a later date. Snapshot of the holders and accounts will be taken on 10th Apr 2021 (at a random time that day)
- 2) LUCKY Airdrop: To reward early adopters of those who bought CLOVER early on Zilswap, we will be airdropping LUCKY to CLOVER HODLers based on the snapshot taken on 10th Apr 2021 (at a random time that day). Amount of LUCKY airdropped to each address will be proportional to the % holding of CLOVER as stated in Viewblock. The airdrop list will subsequently be put up on luckyclover.xyz for transparency.

- 3) CLOVER holders may receive further benefits in the form of LUCKY as well as Zil drops if the Advertising and NFT model proposed below kicks off. This of course is not guaranteed and depends on the level of market adoption.
- 4) We will from time to time decide to do random token giveaways to our CLOVER holders in appreciation of their support for CLOVER. (to be refined further)
- 5) CLOVER is also envisioned to be able to be swapped or exchanged for high value NFTS or real world merchandise. (to be refined further)
- 6) (Reserved for future updates)

LUCKY proposed use cases

1) Advertising

- Advertisement space in the Zilliqa platform is currently underrepresented and we recognise the demand for it in the community. We plan to dedicate advertisement space on our website luckyclover.xyz to legitimate advertisers (Further details will be given as we develop). We would propose that LuckyC will be the token to purchase advertising space on the luckyclover.xyz website. As a way to give back to the community, a portion (exact proportion yet to be decided. Minimum of 10%, Maximum of 50%) of LuckyC made will be distributed to holders of CLOVER in the proportion of their holdings. There will be a minimum CLOVER holding in order to qualify for the distribution (tentatively set at 100 CLOVER, subject to change) this is to ensure that our total transaction costs for distribution on Zilliqa is kept to a minimum while ensuring that enough redistribution is being done.

2) NFTs

- We recognise the demand for NFTs and we plan to launch high value NFTs in order to meet the market demand. These will likely be through mintable.app . Likewise, we would like to give back to the community and a portion (exact proportion yet to be decided, Minimum of 10%, Maximum of 50%) of zil made will be distributed to holders of CLOVER in the proportion of their holdings. There will be a minimum CLOVER holding in order to qualify for the distribution (tentatively set at 100 CLOVER) this is to ensure that transaction costs on Zilliqa are kept to a minimum while ensuring that enough redistribution is being done

- 3) Marketplace (Future use case. KIV)
 - LUCKY is envisioned to be able to be swapped or exchanged for real world merchandise. To be explored further in future updates.
- 4) (Reserved for future updates)

Developers may need to swap their tokens in the open market from time to time in order to have adequate funds to continue the project. (We need to pay for hosting, distribution and development costs too!) We will do our utmost best to do so with minimal price disruption. We want to be upfront about this from the start.

Lucky Clover (CLOVER)

Contract Address: zillufg27uhneft476gth7c0my566n4m3mum4pnyxy

Total Token Supply: 77,777.778

Breakdown of initial distribution

Developer: 37,777.778 (To be allocated as initial seed funding, reserves, and future distribution)

Pre-Launch allocation: 10,000

Contribution to Liquidity Pool: 30,000

LuckyC (LUCKY)

Contract Address: zillz99wjqd57rge9q08xmca6aktvg8sr3f7mpj5cv

Total Token Supply: 210,000,000

Breakdown of initial distribution

Developer: 170,000,000 (To be allocated as initial seed funding, reserves, and future distribution)

Pre-Launch allocation: 20,000,000

Contribution to Liquidity Pool: 20,000,000
